1 BACKGROUND

The Yolanda (Haiyan) Map App is an application that displays multi-hazard and suitable/safe areas covering the following areas devastated by the Typhoon Yolanda (Haiyan).

2 HARDWARE/SOFTWARE REQUIREMENTS

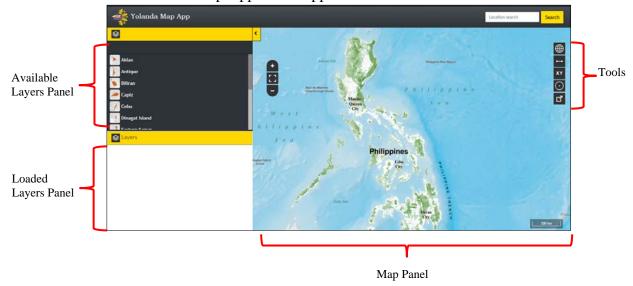

Minimum hardware requirements:

- Operating System: Windows 7 / Windows 8 / Windows 10
- Processor: Intel® CoreTM 2 Duo or AMD AthlonTM 64 X2 5600+
- Video: NVIDIA® GeForce® 7600 GT or ATITM RadeonTM HD 2600 XT or Intel® HD Graphics 3000 or better
- Memory: 2 GB RAM
- Internet: Broadband Internet Connection
- Resolution: 1024X768 minimum display resolution

3 GETTING STARTED

3.1 LAUNCHING THE APPLICATION

- 3.1.1 Open a web browser and go to http://www.geoportal.gov.ph. Click the Menu \rightarrow Map Apps \rightarrow Yolanda.
- 3.1.2 The Yolanda Map App screen appears.

Available Layers Panel

Displays displays the multi-hazard and suitable/safe areas covering the following areas devastated by the Typhoon Yolanda (Haiyan)

An application that

Loaded Layers Panel

Lists all the layers currently loaded in the map and their corresponding legends.

Map Panel

Displays the basemap and layer overlays.

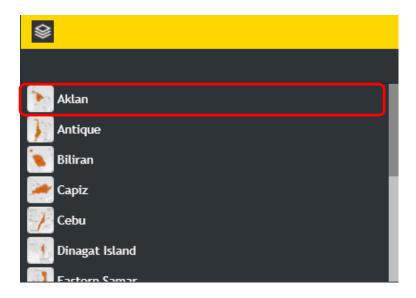

Tools

	Zoom in
+	This is used for zooming in to the map.
	Zoom out
-	This is used for zooming out of the map.
	Zoom to Extent
	This is used to zoom the map to the whole extent of the Philippines.
	Switch Basemap
	This provides different basemap options to use. Currently available are NAMRIA Basemaps, NAMRIA Ortho Image 2011 and 2013-2014 (for selected areas only), NAMRIA

	Ortho Rectified Radar Image, Bing Maps, ArcGIS Online, and Open Street Map.
	Measure tool
	This allows the user to measure distance or area on the map.
	Goto XY tool
XY	This allows the user to go to a particular location on the map by encoding coordinates.
	Buffer tool
\odot	This allows the user to create a buffer from a point, line, circle, or polygon.
	Export Map
ď	This allows exporting of the current map view along with basemap and loaded layers in PNG format.
	Location search
Location search Search	This allows the user to go to a certain location on the map.

3.2 SELECT/LOAD A LAYER

3.2.1 In the **Available Layers Panel**, select a province from the list (multiple layers can be loaded into the map).

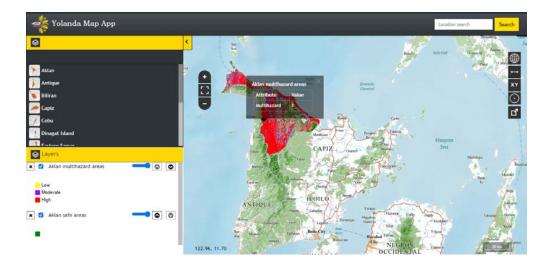

The map will zoom in on the selected province and the multi-hazard and safe areas layers will be displayed on the map and will be listed in the **Loaded Layers Panel** with its corresponding legend.

3.3 IDENTIFY A FEATURE

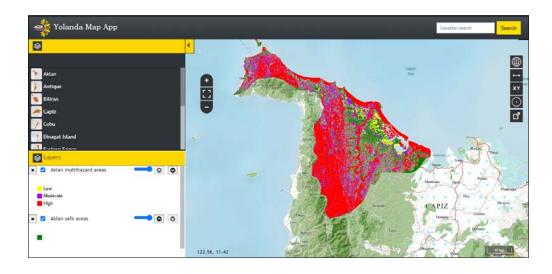

3.3.1 Click on a feature that is displayed on the map.

Displays a popup menu showing the attributes of the selected feature.

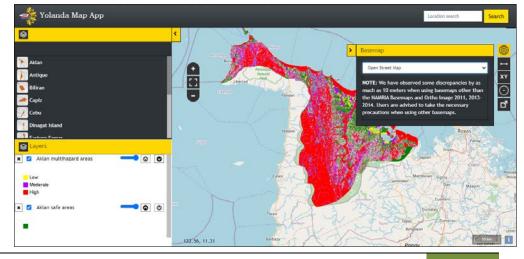

3.4 SWITCH BASEMAP

3.4.1 Click the **Switch Basemap** icon and select the desired basemap.

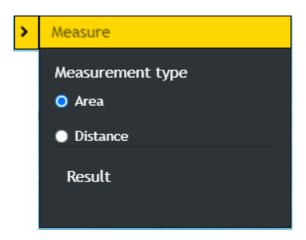

The Map Panel will display the selected basemap.

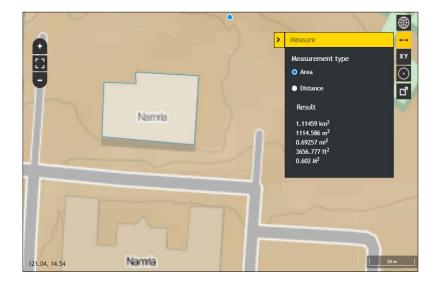

3.5 MEASURE

3.5.1 Click the **Measure** icon.

3.5.2 Measure an area by clicking on a starting point, trace or draw polygon by clicking on the corners of the shape you want to measure, and double-clicking to end. For Distance, click on a starting point and double click on the ending point.

The result will be displayed in different units of measure.

3.6 GOTO XY

3.6.1 Click the **Goto XY** icon. Enter the **Latitude** and **Longitude** of a location and then click the **Go** button.

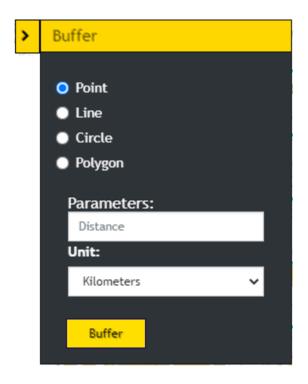

The map will zoom in to the location and will display a popup showing the Longitude and Latitude.

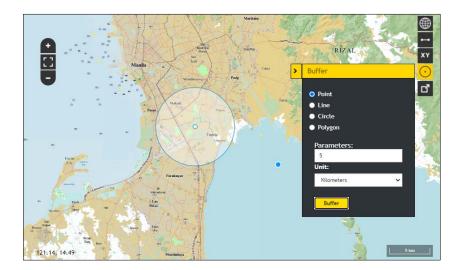

3.7 BUFFER

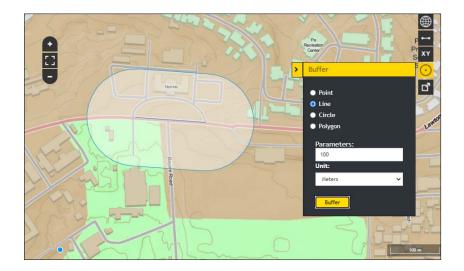

3.7.1 Click the **Buffer** icon.

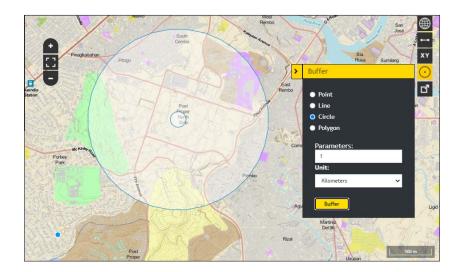

3.7.2 To create a buffer around a point, select the **Point** option. Click a point on the map. Enter the desired buffer parameters (distance and unit). Click the **Buffer** button. A zone around the point measured in the specified distance will be created.

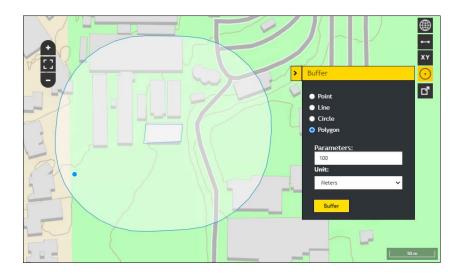

3.7.3 To create a buffer around a line, select the **Line** option. Click a starting point and double click on the ending point to create a line on the map. Enter the desired buffer parameters (distance and unit). Click the **Buffer** button. A zone around the line measured in the specified distance will be created.

3.7.4 To create a buffer around a circle, select the Circle option. Click a point as the center of the circle and drag outward until the desired size of the circle is reached. Enter the desired buffer parameters (distance and unit). Click the Buffer button. A zone around the circle measured in the specified distance will be created.

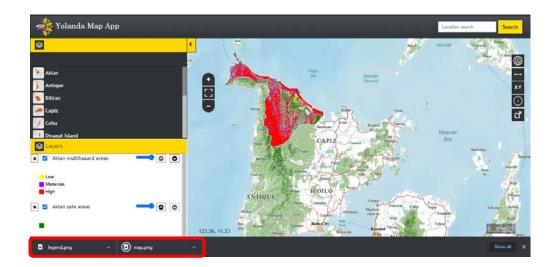

3.7.5 To create a buffer around a polygon, select the **Polygon** option. Trace or draw polygon by clicking on the corners of the shape you want to measure. Enter the desired buffer parameters (distance and unit). Click the **Buffer** button. A zone around the polygon measured in the specified distance will be created.

3.8 EXPORT MAP

3.8.1 Click the **Export Map** icon. The current map view will be downloaded in PNG format.

The current map view along with basemap, loaded layers, and legends will be exported in PNG format.
